## A Cost-Effective Solution to Leadership Training

Utilizing a combination of stakeholder input, group meetings, and on-line collaboration, EPIC allows school leaders to understand and develop solutions that are specific to the needs of their school. We move beyond case studies and hypotheticals to real solutions for the challenges faced by school administrators.

- The **Integrated Leadership Survey**, developed by [Battelle for Kids](#) in conjunction with Ohio University, is utilized to provide principals with feedback on critical aspects of their leadership practice.
- Four group meetings are facilitated by veteran school leaders to understand key research-based leadership practices identified by The Wallace Foundation.
- Three hours of Post-Masters Degree university credit are earned by participants through **William Carey University**.
- Participants are placed in collaborative groups to develop and implement real solutions to the identified needs of their schools.
- An on-line collaborative is created for sharing ideas, challenges, and resources to allow school leaders to work with others to implement desired change.

Individualized on-site coaching is available upon request
